PROJECTS

LaptopZone | <http://laptopzone.us>

LaptopZone is one of the biggest Service to Sell, Repair or Recycle Your Old/Broken Gadgets Through their Professional, Reliable and Fastest Services. Helping you get rid of your old, broken, and used electronic gadgets. LaptopZone is a dedicated Dallas recycling, repairing and buy/sell center-based enterprise motivated to help you with your E-waste.

Role & Accomplishments

- Analyzed the business requirements, developed and implemented the front-end application in React to meet the needs.
- Architected the middleware using a microservices architecture with PHP to aid the connectivity of the front-end application with the Backend via REST API.
- Lead the design and development of both the front-end and the middleware and achieved performance and other stated goals

Integrations with several internal systems at various levels to consolidate data in ERP and then present it in the React- based front–end application.

- Implemented custom workflows for Recycle, Repair, and Sell module.
- Ensured 100% coverage of the JavaScript, PHP, and React code by using open-source frameworks.

Ship Jeannie | <http://shipjeannie.com>

Ship Jeannie is more than a 3PL fulfillment company, it's an experience for a business to have which makes them feel cared for and special. We enjoy to shed spotlight on every employee we have here at Ship Jeannie because we make sure they are here for the same reasons we are, to work for you.

Role & Accomplishments

- Worked on integrating the management system of the recently acquired Merchant into the existing ship Jeannie system.
- Designing a new front–end application that lets users of both Merchant use a single interface that lets them access their respective systems through a single portal.
- Worked closely with the business teams to gather and understand the requirements of the end users of the system.
- Isolated and migrated the existing modules built in React.js MVC, into separate RESTful services developed in PHP for consumption in a new React.js front–end application.
- Designed the UI/UX according to the client's needs.
